Product Feature AND Application of the Automotive Lamps Black Rubber Gasket Sealer:

Automotive rubber gasket sealer is very important, although it is very small, but it will affect the overall use of the car, we still need to pay attention to, good sealing can use life will be very long. We can customize products according to customers' requirements.

It is also important that the gasket allow necessary maintenance by allowing separation and reassembly of the sealing surface. For this reason, it is important to keep the gasket sealed for as long as possible. By selecting the right material for the application and taking into account all the characteristics of the service environment, the service life of the gasket can be significantly increased.
