

Automotive Suspension Shockproof Black Rubber Parts

KINGTOM is a major manufacturer and supplier of rubber products in China. Automotive Suspension Shockproof Rubber Parts is to transfer the force and torsion between the wheel and the frame, and buffer the impact force from the uneven road to the frame or the body, and attenuate the vibration caused by this, in order to ensure that the car can run smoothly.

KINGTOM is a major manufacturer and supplier of rubber products in China. **Automotive Suspension Shockproof Rubber Parts** is to transfer the force and torsion between the wheel and the frame, and buffer the impact force from the uneven road to the frame or the body, and attenuate the vibration caused by this, in order to ensure that the car can run smoothly.

Product Parameter of the Automotive Suspension Shockproof Black Rubber Parts:

①Product name: Automotive Suspension Shockproof Black Rubber Parts

2 Material: EPDM NBR Silicon or Can Custom

③Logo: Can Custom

(4)Size: Can Custom

⑤Can Custom: Black or custom

6 Application: Automotive

©Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc

® Delivery: 30 -50days after sample confirmation

9 Sample: 25-30 days

(1) Payment: 30% deposit, 70% payment before shipment

11) Package: PE bags, Cartons, Pallet

(12) Payment Terms: T/T,L/C and so on.

(13) Shipment Way: Vessel, Air, Express etc.

Product Feature AND Application of the Automotive Suspension Shockproof Black

Rubber Parts:

Black rubber parts shockproof suspension system refers to a connecting structural system between the body, frame and wheel, and this structural system contains shock absorber, suspension spring, anti-tilt bar, suspension secondary beam, lower control arm, longitudinal bar, steering knuckle arm, rubber bushing and connecting rod and other components.

When the car driving on the road because of the ground changes and vibration and impact, some of the impact force will be absorbed by the tire, but the vast majority of the suspension device between the tire and the body to absorb.
